

Corrosperse 177X
Xylene Based Strontium Chromate Dispersion

General Features:

- Resin Free
- No Dust - Complies with New OSHA PEL Regulation
- Stir in Capability
- Competitively Priced

Characterized by:

- High Strontium Chromate Content
- 7 Hegman Dispersibility
- Extremely Low Levels of Rheological Additives

- Excellent Lot to Lot Quality Consistency

Benefits

- Reduced Worker Exposure
- Reduced Waste Disposal Costs
- Reduced Need for Air and Medical Monitoring
- Increased Productivity

Recommendations:

- See pertinent documentation

The recommendations made herein are based on our research and on the research of others; and are believed to be accurate. No guarantee of the accuracy is made, however, and the products discussed are sold without warrant, expressed or implied, and upon the condition that purchasers shall make their own tests to determine the suitability of such products for their particular purposes.

Xylene Based Strontium Chromate Dispersion

<u>Characteristic Parameters</u>	<u>Typical Values</u>
Appearance	Yellow Paste
Specific Gravity	1.90 - 2.10
Bulking Value (gal/lbs)	0.057 - 0.063
Solids, %	70.0 - 72.0
Viscosity, KU	≤ 130
Fineness of Grind (Hegman Value)	7.0
